

Experiment 5: two- versus three-dimensional dynamics and 3D cost scaling

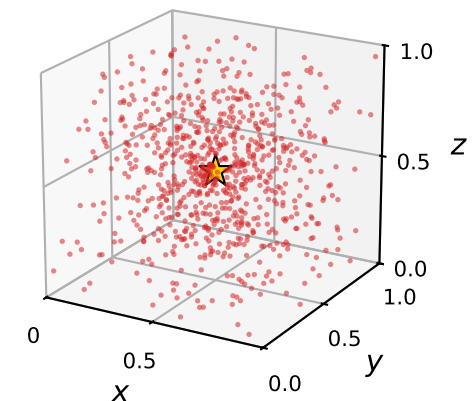

(a) chemotactic localisation

(b) 2D final, $R_c = 0.293$, $\mathcal{A} = 1.41$

(c) 3D final, $R_c = 0.387$, $\mathcal{A} = 1.62$

(d) 3D long-range force: octree versus direct summation
